SUMMARY

Experienced Analyst Software Engineer with a proven track record in software development and skilled at DevOps techniques, cloud computing, and automation tools. Ready to leverage a strong foundation in DevOps engineering to drive efficiency and promote continuous process enhancement in your team.

SKILLS

- Version Control Systems: Proficient with Git and familiar with other version control systems, ensuring efficient collaboration and version management.
- Release Management: Skilled in establishing and improving CI/CD pipelines for seamless product releases and continuous delivery.
- Operating Systems: Proficient in Linux operating systems, commands, and administration.
- Kubernetes: Experienced in Kubernetes application lifecycle management for deployment and management.
- Monitoring and Data Gathering: Skilled in monitoring software delivery pipelines and gathering data to assess performance and stability.
- Continuous Improvement: Actively contribute to continuous improvement practices, enhancing process efficiency and effectiveness.
- Collaboration: Strong ability to collaborate with development squads and cross-functional teams, fostering a cooperative work environment.
- Cloud Platforms: Proficient with AWS for deploying and managing cloud-based applications and services.
- Ansible: Knowledgeable in using Ansible for automation and configuration management.
- Integration: Experienced in third-party application design, integration, support, installations, and configurations.
- Innovative Solutions: Ability to identify and implement innovative process/procedural improvements, driving operational excellence.
- Terraform: Knowledge of Terraform for infrastructure management and automation.
- Communication: Strong communication skills to effectively connect with people and topics, ensuring clear and effective information exchange.
- Networking: Understanding of networking concepts and technologies, crucial for managing and troubleshooting network-related issues.
- Database Management: Experience in managing and working with databases, ensuring data integrity and optimal performance.

EXPERIENCE

EXCEL R

BENGALURU, INDIA

DevOps Engineer intern

(Jan 2024-Jul 2024)

- Deployed applications using AWS (EC2, RDS) and implemented CI/CD pipelines with Jenkins, GitHub, and Docker, streamlining the deployment process.
- Managed monitoring systems with Prometheus and Grafana, effectively resolving performance issues and ensuring system reliability.
- Collaborated with cross-functional teams to ensure smooth operations, documenting configurations and processes to maintain clarity and consistency.

DXC TECHNOLOGY

BENGALURU, INDIA

Analyst Software Engineer

(Jun 2022- Nov 2023)

- Customized the present COBOL programs to new business requirements to improve functionality, eliminate errors, and maximize performance.
- Analyzed user needs, system architecture, and business procedures to determine the feasibility and extent of COBOL programming initiatives.
- Collaborated with project managers, BAs, and programmers to gather and clarify stakeholder requirements, ensuring efficient project organization and scope definition.

EDUCATION

- **B. TECH COMPUTER SCIENCE ENGINEERING REVA UNIVERSITY BENGALURU, INDIA (Jul 2022)**
- **DIPLOMA IN COMPUTER SCIENCE ENGINEERING, GOVERNMENT POLYTECHNIC CHINTAMANI, INDIA (Jul 2019)**

CERTIFICATIONS

- Cloud Computing – NPTEL (2021)
- Introduction to Cobol programming – Coursera (2022)
- Cobol Mainframe training – DXC Technology (2023)
- Code of Conduct Training – DXC Technology (2023)
- DevOps – Application life cycle management - Alison (2024)

PROJECTS

- **PHP Guestbook Application Deployment using Kubernetes**
- **GitHub Access Monitoring Script Shell Scripting**
- **DevOps Codepipeline using AWS**
